

## Online platform

The EPALE platform has been actively used for a long time with the purpose of introducing the training activities already carried out by our institution to promote our training activities and to raise awareness among our stakeholders in the field of adult education. This platform has also been actively used during project preparation to find suitable course providers and training activities in line with our project objectives. A resource review related to our project was conducted and awareness was created by informing the staff about this platform at project information meetings.

This platform is intended to be used actively in dissemination activities from the beginning of our project. It will be actively used to share the knowledge and experiences gained within the scope of the project activities with other adult education institutions in Europe to exchange, disseminate and promote the best practices in adult education. In addition, our staff will be provided with access to the adult learning platform to share the latest developments in adult education and learn from each other. Our goal is to establish an active cooperation with our adult education staff by participating in interesting joint working groups to be established on this platform. Project summary and basic information about the project (objectives, activities, results, information of project coordinator and host institutions etc.) will be shared on this platform. Thus, it will be ensured that the stakeholders who want to learn more in the field of adult education will contact us and establish potential collaborations. The trainers participating in the training will be encouraged to share their knowledge and skills gained through the trainings on this platform.

The Erasmus + Project Results Platform was also used to find suitable host organizations for our project. This platform will be used actively in order to increase the visibility of our project and to disseminate the results of the project by uploading project outputs during the implementation phase of our project. Furthermore, this platform will continue to be used for new project ideas and inspirations from other projects for the next project applications.

The dissemination on these platforms will be coordinated by the project leader and all the participants are responsible for sharing and updating the projects activities, results regularly.
